Experience

IBM Research AI, Research Intern Summer 2019

- *Mentor:* [Avirup Sil](#), [Radu Florian](#)
- We developed a rewriting framework that converts questions of diverse forms into hypothesis-premise pairs for data augmentation. Through transfer learning we significantly improved the accuracy of Boolean questions. (The 2nd best model on SuperGLEU leaderboard.)

ADAPT Lab at SJTU, Research Assistant 2014-2016

- *Advisor:* [Kenny Q. Zhu](#)
- We leveraged textual knowledge such as audible entity taxonomy and co-occurrence statistics to improve the accuracy of automatic scene recognition.
- We developed a framework to identify the most related noun concepts for entity-predicate triplets.
